NMME Sub-seasonal Forecast System Exploratory Workshop
AGENDA
MARCH 30-31, 2015

NCWCP Conference Center
5830 University Research Court, College Park, Maryland

Monday, March 30

8:00-8:15  Coffee/refreshments
8:15-8:30  Welcome & Workshop Scope (Jin Huang and Annarita Mariotti)

Session 1: Overview & Motivation
8:30-9:00  Overview of Challenges in Subseasonal Prediction (Frederic Vitart)
9:00-9:20  Overview of NMME Project and Subseasonal Experiment (Ben Kirtman
and Kathy Pegion)
9:20-9:40  Bridging the Gap Between Forecast and Action (John Dutton)

Session 2: Sources and limits of subseasonal predictability
(Chair: TBD, Rapporteur: TBD)
09:40-09:55  Land-Atmosphere Interactions (Randy Koster)
09:55-10:10  Ocean-Atmosphere Interactions (Eric Chassignet)
10:10-10:25  Predictability of Tropical Subseasonal Variability (Duane Waliser –
remotely)
10:25-10:45  Coffee Break
10:45-11:00  NAO prediction and the stratosphere (Adam Scaife - remotely)
11:00-11:15  MJO-NAO connection and its impact on subseasonal prediction (Hai Lin)
11:15-11:30  Linking stratospheric predictability to prediction (Ming Cai)
11:30-11:45  Blocking (Stan Benjamin)
11:45-12:00  Extremes (Scott Weaver)
12:00-1:00  Lunch

Session 3: Existing Modeling Systems (experimental or operational) sub-seasonal
prediction skills  (Chair: TBD; Rapporteur: TBD)
  - Each presentation should include:
    o prediction system components
    o system design (e.g., initialization, reforecast frequency, ensemble size)
      including requirements and computational aspects
    o current or planned prediction products including skill assessment
    o requirements for future development
    o readiness of hindcasts for research

03/04/2015
1:00-1:15  NCEP (Hendrik Tolman)
1:15-1:30  ECMWF (Frederic Vitart)
1:30-1:45  UK Met Office (Anca Brookshaw)
1:45-2:00  Environment Canada (Bertrand Denis)
2:00-2:15  Navy (Tim Whitcomb)
2:15-2:30  NCAR (Ben Kirtman)
2:30-2:45  NASA (Siegfried Schubert)
2:45-3:00  ESRL (Shan Sun)
3:00-3:15  GFDL (Gabe Vecchi)
3:15-3:30  APCC (Haejeong Kim)

3:30-3:45  Coffee Break

Session 4: Breakout Session: Bridging the gap between predictability and current skill
(split into two groups designed to be random except for Chair and Rapporteur chosen to lead discussion)

3:45-5:00  Group 1 (Chair: Jim Kinter; Rapporteur: TBD)
3:45-5:00  Group 2 (Chair: Ben Kirtman; Rapporteur: TBD)

Focus Questions
- What are the most important scientific questions that need to be answered to bridge the gap between current and potential skill for subseasonal timescales?
- Without resource limits, how would you approach answering those questions?
- How would a multi-model ensemble re-forecast contribute to answering those questions?
- Within resource limits, what system improvements (e.g., horizontal resolution, stratospheric vertical resolution, ensemble size, initialization) are most likely to cost-effectively improve sub-seasonal skill?

Tuesday, March 31

8:00-8:30  Coffee/refreshments
8:30-9:00  Breakout Session Report Back

Session 5: Needs, requirements, feasibility for deployment of a subseasonal NMME prediction system (Chair: TBD; Rapporteur: TBD)

9:00-9:20  Feasibility and requirements from NCEP/CPC forecast perspectives (Jon Gottschalck)
9:20-9:40  Air Force needs/requirements for subseasonal Products (Mike Gremillion)
9:40-10:00  Overview of Research Community Needs (Andrew Robertson)
10:00-10:20  Lessons and plans on WMO infrastructure for sub-seasonal to seasonal predictions. (Arun Kumar)

10:20-10:30  Coffee Break

03/04/2015
**Session 6: Breakout Session: Needs and requirements for a subseasonal NMME prediction system (participants self select into community/group they most identify with)**

10:30-Noon  Group 1: Feasibility, technical and engineering requirements (Discussion Lead: Jon Gottschalck; Rapporteur: Kathy Pegion)

10:30-Noon  Group 2: Research Community Needs & Requirements (Discussion Lead: Siegfried Schubert; Rapporteur: Emily Becker)

**Focus Questions:**
- What are the needs for a subseasonal NMME prediction system to be useful to your community (both re-forecast and real-time components)?
- What are the data needs (e.g. format, frequency, flow, access, variables, etc.)?
- What needs are critical vs. negotiable?
- What is your ideal system given no limitations on resources?
- How would you use the system you envision?
- What are the key benchmarks you consider necessary to demonstrate success of such a system?
- What are the feasibilities of deploying a NMME subseasonal forecast system including technical, data, and engineering aspects?

Noon-1:30  Lunch

1:30-2:00  Breakout Report Back

**Session 7: Design of a potential re-forecast experiment that would test the feasibility and skill improvement of an NMME-type sub-seasonal system and set of products compared to other approaches (Lead by Organizing Committee)**

2:00-3:00  Synthesis & Discussion
- Will present and discuss a proposed subseasonal re-forecast experiment with emphasis on how this will meet operational (e.g. CPC) and research (e.g. S2S + others) needs defined in breakout sessions.
- Will present and discuss how this experiment can be used to address scientific opportunities (e.g. those discussed in day 1 breakouts).
- Data issues

3:00  Meeting Adjourns

**Closed Meeting**

3:00-5:00  Organizing Committee Meeting and representatives from operational centers and S2S community.
