

Global Tropics Hazards/Benefits Assessment - Climate Prediction Center - Issued: 6/29/2009

Product issued once per week with no updates. Conditions are subject to change after issuance time and before next outlook.
Product targets broad scale conditions integrated over a 7 day period for US interests only. Please also consult your local responsible forecast agency.

Week 1 Outlook – Valid: June 30 – July 6, 2009

1. An increased chance for below-average rainfall for parts of the Maritime Continent. Regional scale subsidence consistent with the transition to El Nino conditions increases the chances for below average rainfall. **Confidence: Moderate**

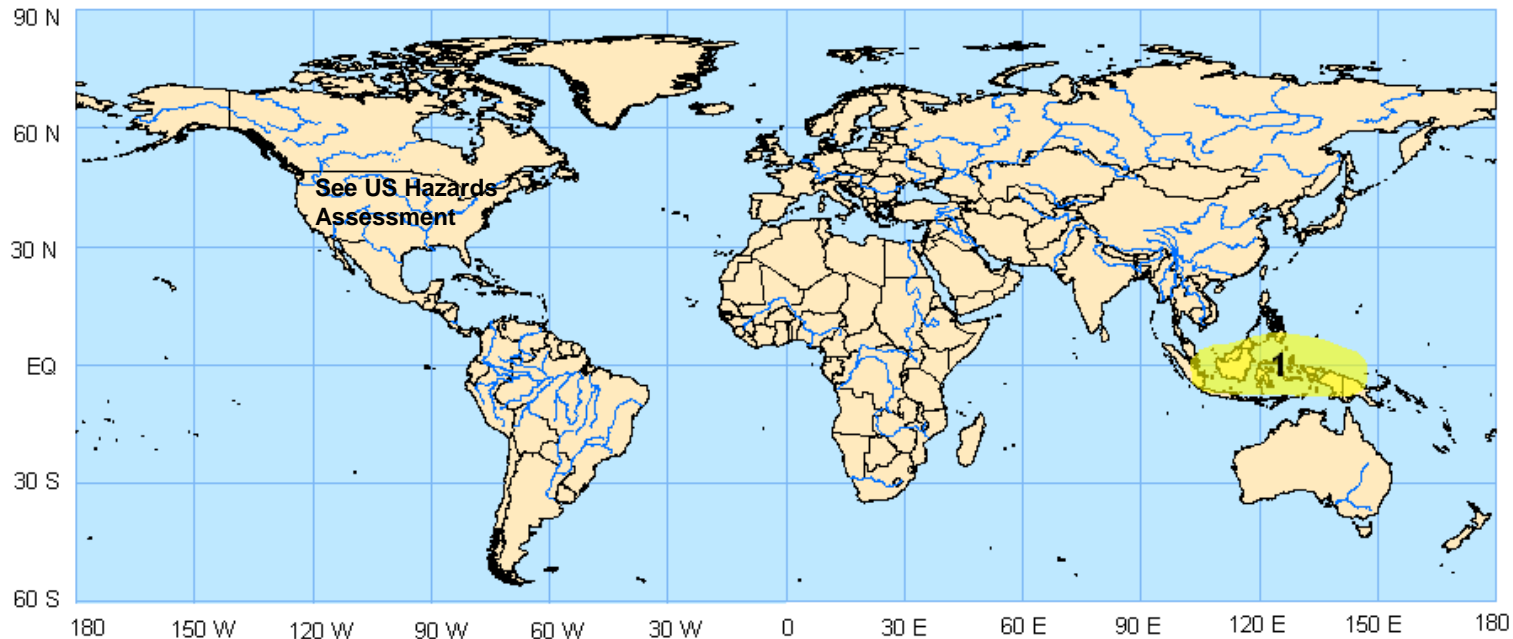

Please note: Confidence estimates are subjective in nature and are not based on an objective scheme. The estimates are given to provide additional information to the user.
