

Product issued once per week with no updates. Conditions are subject to change after issuance time and before next outlook.  
Product targets broad scale conditions integrated over a 7 day period for US interests only. Please also consult your local responsible forecast agency.

## Week 1 Outlook – Valid: March 2 – 8, 2010

### Synopsis:

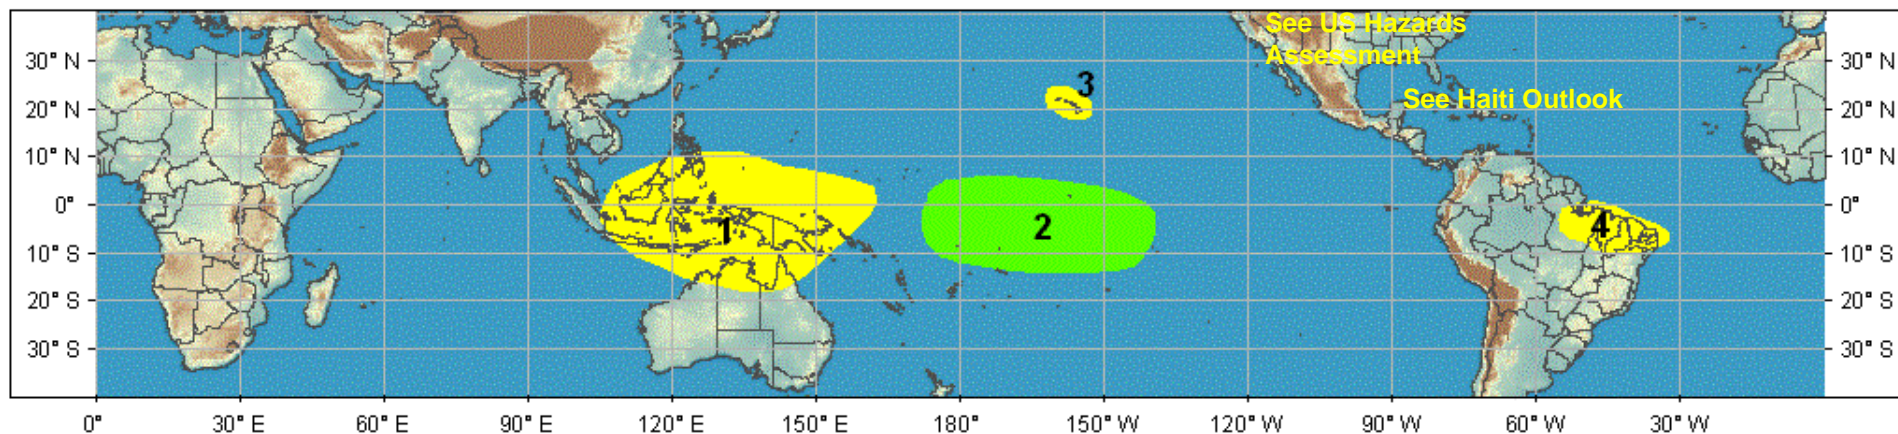

- 1. An increased chance for above-average rainfall for parts of eastern Africa.** Anomalous low-level convergence is expected to enhance rainfall in this region during the period. **Confidence: Moderate**
- 2. An increased chance for below-average rainfall for the Maritime continent and northwest Australia.** El-Niño conditions favor below-average rainfall in this region and some model guidance indicates near or below average Australian monsoon intensity. **Confidence: Moderate**
- 3. An increased chance for above-average rainfall for parts of the west-central Pacific.** El-Niño conditions and extratropical frontal activity favor above-average rainfall in this region. **Confidence: Moderate**
- 4. An increased chance for below-average rainfall for Hawaii.** El-Niño conditions and numerical forecast guidance favor suppressed rainfall in this region. **Confidence: High**
- 5. An increased chance for below-average rainfall for northern Brazil.** El-Niño conditions and numerical forecast guidance continues to favor below-average rainfall in this region. **Confidence: High**
- 6. An increased chance for above-average rainfall for east-central Brazil.** Numerical forecast guidance indicates a wet pattern for this region during the period. **Confidence: Moderate**

**Please note:** Confidence estimates are subjective in nature and are not based on an objective scheme. The estimates are given to provide additional information to the user.
